MinervaClarity

The (Unofficial) Sapienza Theme

Dario Loi

7th October 2024

Introduction

This is a sample slide to demonstrate the **Minerva** theme for Marp.

1. The color scheme is based on the official university palette.

2. The design is clean, modern, and professional.

3. It's easy to use and customize.

Key Features

You can use standard Markdown syntax to create your slides.

Links and Blockquotes

You can add links like this one to the Sapienza website.

> *Blockquotes are great for emphasizing a key point or citing a source. They are styled with the Sapienza red accent color.*

Code Blocks

The theme includes styling for both inline and block code snippets. Here is an example of a Python code block:

```python
def main():
    """Prints a welcome message."""

    if 4 >= 3: # With ligatures!
        print("Welcome to my presentation!")

if __name__ == "__main__":
    main()
```

Integrated MathJax Support

You can include mathematical expressions using LaTeX syntax. For example, here's the triangular number formula:

$$T_n = \sum_{k=1}^{n} k = \frac{n(n+1)}{2}$$

Another Section

Use the `class: lead` directive

to create a title slide for a new section!
